

Guilherme Marques da Silva Nicolino

Software Engineer | Backend | Full Stack | Applied AI | Computer Vision | LLMs
gui.marques@usp.br · São Paulo, SP · <https://www.linkedin.com/in/guilherme-nicolino-8a6331153/>

PROFESSIONAL SUMMARY

Software Engineer with experience in backend development, APIs, reliable data processing, and distributed systems for critical operations in logistics, finance, and infrastructure. Works with C#, .NET, ASP.NET, Python, SQL Server, Oracle, RabbitMQ, Docker, React.js, and Git to build services, integrations, and applications focused on reliability, traceability, performance, and continuous evolution. Also develops academic and independent projects in applied AI and computer vision.

PROFESSIONAL EXPERIENCE

Technical Analyst in Mission-Critical Environments

05/2025 — 02/2026

ENGENHEIROS ASSOCIADOS - EA

Technical work in mission-critical environments, including commissioning, testing, and validation of high-reliability electrical infrastructure, mainly in data centers. Performed and analyzed tests on protection systems, cables, transformers, breakers, UPS, ATS, STS, and generators, with a strong focus on documentation, compliance, and technical validation. Conducted short-circuit, protection coordination, load flow, grounding, and root cause analyses using ETAP, PTW, PSCAD, and MATLAB/Simulink.

DevOps | .NET | Distributed Systems

02/2021 — 01/2025

ABNET SISTEMAS LOGÍSTICOS

Developed backend services, REST APIs, and business rules in C# and ASP.NET for warehouse and logistics operations, with a focus on availability, traceability, and performance. Worked with SQL Server and Oracle on data modeling, queries, integrations, and routine optimization for high-volume transactional environments. Implemented asynchronous communication with RabbitMQ and containerization practices with Docker.

Backend Programmer | Financial Systems | Python

01/2018 — 01/2021

IBOTZ TECNOLOGIA

Developed Python solutions for automated matching, reconciliation, and reliable data processing in the financial market. Built routines to reconcile internal systems, brokers, and exchange records, prioritizing consistency, auditability, and reduced manual intervention. Worked with large data volumes and sensitive business rules, contributing to operational stability and the reliability of financial workflows.

Full Stack Programmer | .NET

05/2012 — 06/2017

BYMK FASHION

Developed and maintained end-to-end web applications with C#, ASP.NET MVC, and SQL, covering backend, persistence, and user interfaces. Implemented frontend features with HTML, CSS, and JavaScript, with a focus on usability, performance, and evolutionary maintenance. Worked on data modeling, version control with GitHub, code review, and deployment routines.

EDUCATION

MBA — Software Engineering

01/2026 — Present

Escola Politécnica da USP (PECE Poli)

Bachelor's Degree — Electrical Engineering with Emphasis on Electronics and Computer Systems

2024

Escola Politécnica da USP

Technical Degree — Programming and Systems Development

2009

IFSP

SKILLS

C# · .NET · ASP.NET · REST APIs · Python · SQL Server · Oracle · RabbitMQ · Docker · React.js · JavaScript · HTML · CSS · Git · GitHub · TensorFlow · Keras · PyTorch · OpenCV · MATLAB · Simulink · ETAP · PSCAD · PTW · Distributed Systems · Data Modeling · Computer Vision · Image Classification · Image Segmentation · Testing and Validation ·
